BUILDERS & CONTRACTORS, SINCE 1992

Ph: (410) 426-3690

Severn School

**Address: 201 Water Street
Severna Park, MD 21146**

Owner: Severn School

We were invited to interview and were subsequently selected for a project at Severn School in 1997. The Student Center was the first building in their master plan to rebuild the campus. That first project was completed in 1999.

During the past 20 years we have continued to work at the campus. All of the original buildings and infrastructure have by now either been replaced or have undergone a complete rebuild. Approximately \$36 million of construction.

We have acted as the Construction Manager / General Contractor and used a GMP contract method for all of the school projects.

Every building seen in the pictures, including the turf fields, bleachers and parking lots, has been our work. The campus has been built out and there is no more space for the school to expand at this location.

Severn has recently purchased another school campus that will undergo a renovation starting in a year or so.
